"Two is better than one"

teaser!
NEW PRODUCT

ESBE
Serie UPTT500

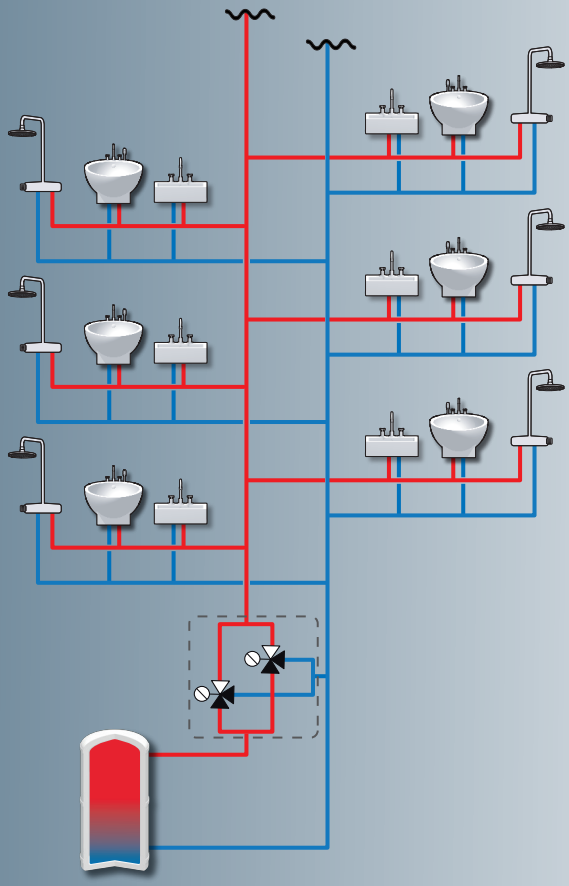

Parallel-connected mixing valves

- **REFINED REGULATION ACCURACY**
- **COMPACT DESIGN**
- **ADAPTED FOR BOTH HIGH AND LOW FLOWS**
- **COST EFFECTIVE**

SWEDISH HYDRONIC SOLUTIONS SINCE 1906

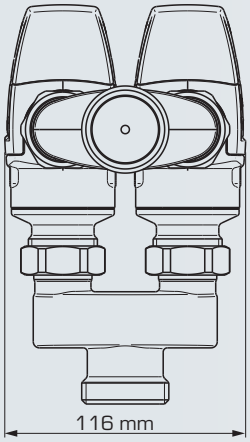

PARALLEL-CONNECTED
mixing valves, in compact design

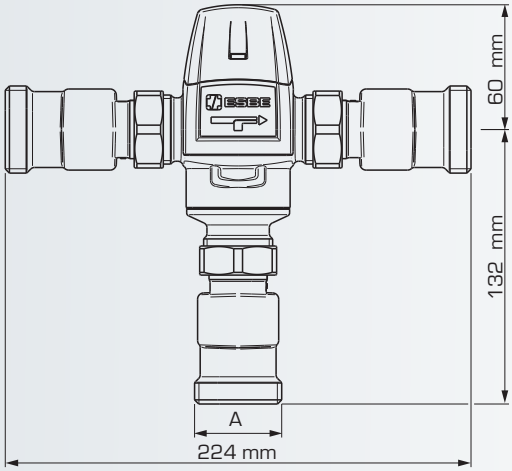

- UPTT522 are two parallel-connected thermostatic mixing valves, that provide high performance at both high and low flow, without compromising the valves' fast and precise regulation
- Can handle up to 1l/s, which corresponds to the estimated flow for approx. 20 apartments.

Here for you in Q3 2024

SERIES UPTT522, EXTERNAL THREAD

Art. nr.	Referens	Temperatur	Kvs*	Connection A	Weight [kg]
31420200	UPTT522	45 – 65°C	6,0	G 1 1/4"	2,8
31420300		50 – 75°C		G 1 1/4"
